# BINKS DX70

***Binks DX70 is the low cost spray solution compared to pressure tanks with no expensive annual pressure test certification regulations.***

- Acetal pump body with st. st. balls and soft seats for universal paint compatibility including ceramic glaze coatings
- The unique diaphragm design and "built in" fluid regulator provide consistent pressure and readily adjustable paint flow
- The non-stall air valve provides smooth, quiet and surge free paint delivery up to 1000 cc/minute
- Clearly labelled air regulators provide independent control of pump and spray gun fluid and air pressures
- Quick release air, fluid inlet and outlet connections for faster maintenance
- Re-circulation/dump valve accessory for faster colour changes reducing down time, saving time and money
- Pump outfit mountings include Cart, Wall, 25L Pail & Tripod outfits with or without spray guns and hoses
- Outfits with fluid filter are available for finer paint finishes.

***The Binks DX70 Series is the perfect solution for one or two spray gun applications with faster colour changes and quick refills for less production downtime.***

# BINKS MX

***Binks MX Air Assisted Airless & Airless pumps have the pumping power and fluid delivery capacity for all of those heavy duty applications in general industry.***

- Five Year pump warranty
- Magnetic detent design (patent) for quick stroke change over with no pulse or surge
- Stainless Steel system – pump and gun
- Airless and Air Assisted Airless Gun's provide the latest atomisation technology
- Modular design for reduced maintenance and down time
- Self adjusting spring loaded packings with large sight glass for visual packing inspection
- Manufactured to ISO9001, CE Marked and fully ATEX approved.

The Binks Raptor LITE spray packages feature the Binks Stainless Steel high pressure pump with Binks AA4400M Air Assisted Airless Spray Gun OR Airless 75. Binks LITE outfits have been designed to provide users with a low cost, robust industrial spray outfit, able to apply a wide range of industrial coatings whilst providing the very best quality of spray finish.

*The unique Binks AA10 HVLP (54-5890K) air cap atomises at lower air pressures to provide the highest transfer efficiency with best finish.*

***Binks MX pumps utilise patented magnetic detents to dramatically enhance smooth pump operation and change over with no pulse to provide the best "surge free" paint delivery for the perfect finish.***
